Carnegie Mellon MS + MBA; 5+ Yrs Exp in Product & Banking across Designing AI Platforms, Agentic AI, ML at Scale & Stakeholder Management. Built Startup with 11K Users; Banking Exp- Generated \$190M/ Year Sales Funnel, PM Consultant for AI Cashflow App

WORK EXPERIENCE

- Founder & Product Lead - ProjectsYard

02/2026 - 08/2026

 - Built projectsyard.com (Ranked Top 10 on Product Hunt) - Platform that turns scattered projects across GitHub repos, Lovable sites, Vercel URLs, demo videos, slides into searchable projects & gives recruiters a natural-language search engine over it
 - Growth & Acquisition:** Onboarded 11,000+ users in 6 months of launch by orchestrating a multi-channel GTM strategy
 - RAG/Vector Search:** Engineered NL recruiter search over 750+ dimension vector embeddings with hybrid semantic + structured SQL retrieval with multi key, quota aware inference routing with fallback on model call for fault tolerant results
 - Agentic AI:** Replaced live first round technical screens with agentic assessments in isolated cloud desktops & generates evidence cited skill reports - 2,000+ AI assessments across 10+ hiring teams at ~\$4.0 each, cutting screening effort ~55%.
- Product Manager Consultant - PNC BANK

08/2025 - 12/2025

 - Customer Research:** Ran mixed-methods discovery - 90+ SBO surveys, 10 interviews, 16-competitor benchmark - identifying a \$2B gap - 95% of small businesses receive no financial insight from their bank or lack the proficiency to act on these insights
 - Agentic Insight Engine:** Designed AI agents fusing 1,700+ macro and microeconomic indicators with live transaction data into industry-specific, one-click financial actions rather than passive reporting, right from mobile app. **Patent Pending**
 - Multi Agent Workflows:** Architected multi-agent LangGraph workflows with tool-calling over Open-Banking APIs in ~ 4 weeks
- Manager, Corporate Banking - ICICI BANK

04/2023 - 11/2024

 - Customer Focus:** Managed a portfolio valued at \$650M comprising of 45 large corporations including Fortune 20 companies by effectively aligning bank's services to client investment and capital requirements, resulting in annual revenue of \$7M.
 - Product Development:** Built and shipped a document-processing pipeline used across bank that parses client financial statements in 60+ languages, normalizes multi-currency figures to INR, and auto-populates the bank's proprietary credit model across ~30,000 documents/year for ~3000 corporate clients, cutting appraisal turnaround by 25%.
 - Product Growth:** Created new sales funnel to grow our portfolio by over \$190M in 2024 by partnering with firms well before their India entry by mapping touchpoints & intervention. Scaled to onboard 15 Fortune 500 B2B deals (Micron, Foxconn) in 1 Yr
 - Executive Communication:** Trusted with making & delivering C-suite presentations within the first year - only manager at my grade presenting to the senior committee - delivering ~25 presentations that shaped credit approvals and strategy signoffs.
- Product Marketing Intern - GALDERMA (Cetaphil)

04/2022 - 07/2022

 - Customer Insights & Analysis:** Segmented and modelled a 1900-respondent dataset in SPSS to isolate the attributes & sales channels driving willingness-to-pay, setting positioning and price tiers for 4 nationally launched products.
 - Product Launch:** Captured 2 - 3.5% market share within year one across 4 SKUs (cleansers, face wash, moisturizer) by benchmarking against competitor products to establish differentiated positioning and launching the go-to-market campaign.
 - Process Automation:** Took initiative & built a Python validator for supply chain team encoding discount-code and product-bundle rules, cutting reconciliation from ~ 20 hours to <10 mins every month and eliminating manual matching errors.
- Senior Analyst - CAPGEMINI

10/2020 - 10/2021

 - Data Engineering:** Engineered Spark pipelines for client's credit risk platform 200M daily transactions & 16B-row feature store
 - Machine Learning:** Improved credit card default prediction AUC ~3% by finetuning gradient boosting model (XGBoost) tuned for class imbalance via cross-validated hyperparameter tuning, scoring 50M cardholder accounts monthly for credit decisions
- Tech Skills: LLMs & GenAI Development, Agentic AI(LangGraph, Tool Calling), Model Finetuning, RAG, SQL, Java, Python

Product Skills: Product Strategy, Product Roadmap, Go To Market, Market Analysis, KPIs, Cross-Functional Collaboration

AI PROJECTS

- Generative AI Based Knowledge Platform

- Developed a Gen AI Platform to preserve org & tacit knowledge during employee transitions (\$50B Market Opportunity). Designed RAG pipeline - chunking, embedding & semantic retrieval over 1M artefacts - scaling to 200+ users. Pilot test with 17 users showed 85%+ knowledge retention (vs 50% traditional methods). **Patent Pending**
- AI-Native Operating System

- Built & shipped an AI Native Ubuntu OS that replaces shell syntax with natural language. **Fine-tuned** Qwen2.5-Coder-1.5B on NL-to-shell data to power a native AI terminal running fully offline. Designed a novel dual-brain agentic architecture where cloud models (Gemini/Claude) interpret untrusted content but hold zero execution rights, while the local Qwen model never sees external content - closing the prompt-injection path left open by tools like OpenClaw/ Hermes.
- LLM Credit Decision Audit

- Eliminates AI Compliance audit time (2+ weeks) using an Evaluation Harness with Multi-Agent loops that catch hallucination in loan rejections by running concurrent LLM counterfactual trials proving causality. Benchmarked against 19 agents - detecting 100% of defects with zero false positive on the control agent, giving lenders a pre-deployment compliance check

EDUCATION

CARNEGIE MELLON UNIVERSITY, Tech Master of Business Administration	Tech MBA	GPA: 3.8/4	12/2025
INDIAN INSTITUTE OF MANAGEMENT, Master of Business Administration	MBA	GPA: 3.7/4	03/2023
Achievements: National Finalist in Unilever's TechFest Competition (Top 4 /5000+), Selected (Rank 1 / 200) for Exchange Program in S. Korea Top 200 in Tata Imagination Challenge out of 85,000 participants, a total of 11 case competition accolades in 2 years			
MAHINDRA UNIVERSITY, Bachelor of Technology, Mechanical Engineering	B. Sc	GPA: 3.7/4	10/2020
